2023

**BOTANY**

(Honours Core )

Paper : BOT-HC-2026

(Archegoniate)

Full Marks : 60

Time : Three hours

**The figures in the margin indicate full marks for the questions.**

1. Answer the following question: 1×7=7

(i) What is gemma CUP ?

(ii) Polytrichum is mainly —

(a) Heterothallic

(b) Homothallic

(c) Both (a) and (b)

(Choose the correct answer)

Contd.

- (iii) The antherozoids of *Anthoceros* are
- Monoflagellate
  - Biflagellate
  - Quadriflagellate
  - Multiflagellate
- (Select the correct answer)

- (iv) Mention the name of an aquatic fern.
- (v) What is coralloid root ?
- (vi) Name *one* Gymnosperm where xylem vessels i.e. tracheae is present.
- (vii) Name *one* homosporic pteridophyte that found in India.

2. Write short answer of the following :  $2 \times 4 = 8$

- Why sporophyte of *Riccia* is considered simple in structure ?
- Mention *two* angiospermic characters of the ovule of *Gnetum*.
- Mention *two* xerophytic characters of *Pinus* leaf.
- Write notes on *synangium* of *Psilotum*.

3. Answer the following questions : (*any three*)  
 $5 \times 3 = 15$

- What is transfusion tissue ? Explain briefly its function.
- Economic importance of Bryophyta.
- Describe briefly the sporophyte of *Polytrichum* with labelled diagram.
- Why Gnetum is considered as most advanced of the Gymnosperm ?
- Compare the internal structure of early land plants *Cooksonia* and *Rhynia*.

4. Write descriptive answers of the following questions : (*any three*)  
 $10 \times 3 = 30$
